

LAMINAR AIR FLOW

Construction : Hot air oven is made up of tripled walled construction. The cabinets are made using stainless steel material.

The 70mm thick glass wool insulation is provided. The heat is generated inside the oven using the heater fitted on inside the chamber.

Also Available in

- ◆ **Customized Sizes**
- ◆ **GMP model**

Features :

- Static pressure is measured by manometer.
- High efficiency UV LAMP comes with strong germicidal powered and disinfect the area.

TECHNICAL SPECIFICATION:

Motor system	Backward curved centrifugal blowers for low noise
Noise level	65 ± 5 db
Air velocity	90 ± 20% fpm
Inner	Made of Stainless steel Grade - 304 working platform
Outer	Made of GI powder coated
